

Project Development Phase

Model Performance Test

Date	JUNE 2026
Team ID	
Project Name	Plugging-into-the-Future-An-Exploration-of-Electricity-Consumption-Patterns
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

		Successfully imported the Electricity Consumption dataset with fields including Electricity Consumption, Country, Region, Year, and more. Data is correctly displayed in Tableau and linked to visualizations.
2.	Data Preprocessing	Removed missing/null values, ensured data types (dates, strings, boolean) were correctly set, and added calculated fields such as year extraction from Date_inscribed. Filtered out redundant columns. Number of rows after cleaning data:16588
3.	Utilization of Filters	Implemented filters on Country , Region , and Year . Filters are interactive and applied to all visualizations for dynamic exploration.

4.	Calculation fields Used	• Year Extracted from Electricity Consumption Date • Total Electricity Consumption by Country • High Consumption Flag for Pie Chart (<i>IF [Electricity Consumption] >= Threshold THEN 'High Consumption' ELSE 'Normal Consumption'</i>) • Region-wise Electricity Consumption Rate: $\text{SUM}([\text{Electricity Consumption}]) / \text{COUNT}([\text{Country}])$ • Consumption Decade: $\text{INT}(\text{YEAR}([\text{Date}]) / 10) * 10$ • Country-wise Electricity Consumption Percentage: $(\text{SUM}([\text{Electricity Consumption}]) / \text{TOTAL}(\text{SUM}([\text{Electricity Consumption}]))) * 100$
5.	Dashboard design	No of Visualizations / Graphs – 8 No of Dashboards designs- 1
